## UGANDAN EDUCATIONAL FACTS

- 1 out of 4 children in Uganda attend secondary school
- In 2019, the Ugandan government allocated only 10% of its national budget to education, far below the recommended 20%
- Public education in Uganda is not entirely free: parents are required to pay for school fees, textbooks, uniforms, and other school supplies.
- Children of both genders are often forced to forgo school so that they can work and provide income for their families.
- In rural areas, students have to walk miles to attend school. This takes time away from learning and is very unsafe for children.

**(not) back2 school**

Can you imagine at the age of 13, having to decide between attending school or staying home to provide for your three younger siblings? Many children in Uganda do NOT get to go back to school... BUT we can help!

## Mission + Vision

Simone's Kids is a nonprofit ministry going to great lengths to ensure each child receives a quality education, real world skills and understands the clear message of Jesus Christ. We own and operate our Primary and Secondary institutions ensuring quality control, financial accountability and meaningful impact for the communities we serve.

In Nakaseke, Uganda there is a generation of 50,000 children who are trapped in an increasingly hopeless cycle of poverty. Insurmountable barriers to education, extreme undernourishment, and explosive growth of witchcraft steal opportunities to both break out of the poverty cycle and learn about the life-changing hope of the Gospel of Jesus Christ.

Simone's Kids exists to break down these barriers by providing scholarships to orphaned and impoverished children allowing them to attend our educational institutions and other established universities.

## Not Back 2 School 2023

Throughout the month of August, our goal is to increase our monthly income by \$3,000 + raise \$30,000 in one-time donations. We strive to give our children the highest quality of care. With increased monthly donations, we can hire teachers that specialize in trauma care, a specialized counselor, and a special education teacher. Most importantly, we can improve our students' quality of care through better food, textbooks, workbooks, and other classroom needs.

- ✓ Increase current teacher salaries
- ✓ Hire specialized teacher: Special Education + School counselor
- ✓ Improve operation costs for an overall better school environment

### STUDENT TESTIMONY

## Meet Rebecca

When you donate to Simone's Kids you are giving students like Rebecca the ability to attend school. Schools in Uganda are not free, and many of Students would be out of school completely without the help of Simone's Kids. *Rebecca is raised by her single mother, a self-sustaining farmer, who struggles to just put food on the table. Without access to free schooling, Rebecca would be home farming with her mother at the age of 11 to help make a living for their family.* Because of Simone's Kids Rebecca knows she gets to come to school each day to learn, fill her belly, have free medical treatment, and have a place to feel loved & accepted.
